Ataturk Culture Center Construction

About Çağdan A.Ş. Company

Çağdan Engineering Construction Company was established in 1985 under the name of Çağdan Electronic Machinery Industry and Trade Limited Company.

In the first operational years, the company made production of various air cleaning devices, fabrication and erection of steel constructions, dancing water systems with music, and electronic irrigation systems.

After 1999 earthquake, the company has established the priority for preference for making reinforced buildings against earthquake and improved business relations with the world transferring many new technologies through representative offices.

In the field of electronics, the company manufactured and operated many advertising and marketing boards on behalf of Ankara Metropolitan Municipality.

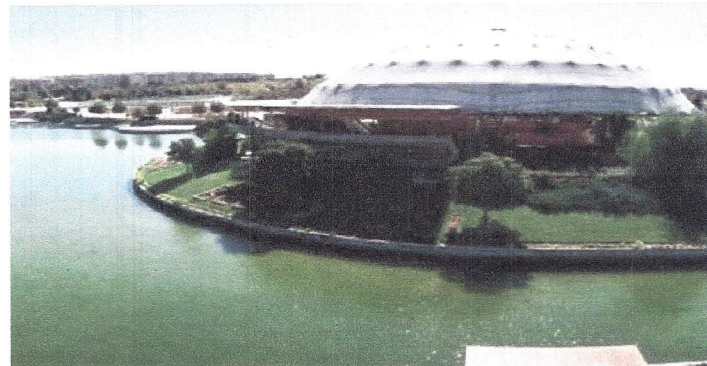

In the following years, the company has made many various construction Works such as multifunctional structures and sport facilities, swimming pools, plants and space frameworks, collective housing, health facilities, dormitory buildings and education facilities.
